

Figure 1 consists of five vertically stacked time-series plots showing the evolution of the normalized difference in the number of cases between the two regions of Italy from April 1 to May 5, 2020. Each plot has a y-axis ranging from -0.2 to 0.4 and an x-axis showing dates and times (0: and 12:). The plots show a black line with '+' markers and a red line with diamond markers. The plots show a general downward trend in the difference over time, with some fluctuations.

Sample size: 713  
Correlation coefficient: 0.951  
Mean Error: 0.011  
Standard deviation of error: 0.044  
Coefficients: -0.00 0.965  
RMS error: 0.045

Sample size: 58  
Correlation coefficient: 0.959  
Mean Error: 0.020  
Standard deviation of error: 0.042  
Coefficients: -0.02    1.040  
RMS error: 0.047
